Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 July 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/571,320, filed on May 15, 2000.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Calamito et al.

Calamito et al. discloses an integrally woven multi-apertured multi-layer angle (3-D, 5 axial) interlock fabric. The fabric 10 has a plurality of apertures 12 formed within the thickness and extending across the width of the fabric (divisibly woven sections). Figures 1 and 2 clearly show a structure used as a solid structural member from a 3-D woven fabric with apertures 12 which represent the “divisibly woven” sections as recited by the instant invention.

The structure of Calamito is identical to the structure of the instant invention. The recitation “for use in manufacturing a solid I-beam material” is considered inherent to the Calamito disclosure in that the structure being identical the material of Calamito could also be used to manufacture a solid I-beam.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Calamito.

Although Calamito teaches all of the limitations of claim 3, Calamito does not teach a stacked honeycomb arrangement. However, Calamito does teach that the fabric could use the divisibly woven sections to produce a structure in fig.3 that is circular in nature rather than honeycomb for use as a structural member.

In that the shape of the member is given no criticality or unexpected results it would have been obvious to one of ordinary skill in the art at the time of invention to use to material of Calamito to provide structural members using the divisibly woven structures to provide some shape whether round or similar to round.

Response to Arguments

Applicant's arguments filed 7/23/2003 have been fully considered but they are not persuasive. Applicant argues that the Calamito disclosure does not anticipate the the I-beam structure recited in claim 3. However, claim 3 recites "fabric for use in manufacturing an I-beam..."; this statement does not add any structural limitations to the invention. Since Calamito teaches each an every structural limitation of claim 3 it

follows that the Calamito structure would also be able to be used to manufacture an I-beam.

Claims 4 and 5 are new claims with new grounds of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
